Art Unit: : 3736

1. The reissue oath/declaration filed with this application is defective because it fails to identify at least one error which is relied upon to support the reissue application. See 37 CFR 1.175(a)(1) and MPEP § 1414. Applicant's declaration fails to properly identify an error being corrected. The declaration merely states that the claims "did not uncover any claim that would appear to literally cover the method as set forth in the attached Shumway-Cook article" and that "my invention was not fully and properly claimed to the extent to which I was entitled. New claims 10-14 more fully and properly claim my invention". MPEP 1414 states: "It is not sufficient for an oath/declaration to merely state this application is being filed to correct errors in the patent which may be noted from the changes made in the disclosure. Rather, the oath/declaration must specifically identify an error". In identifying the error, it is sufficient that the reissue oath/declaration identify a single word, phrase, or expression in the specification or in an original claim, and how it renders the original patent wholly or partly inoperative or invalid.
2. Claims 1-15 are rejected as being based upon a defective reissue declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defect(s) in the declaration is set forth in the discussion above in this Office action.

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: : 3736

4. Claim 15 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In claim 15, paragraph c, the specification does not describe "thereby reducing changes in the angle between the orientation of the subject and the inclination of the support surface on which the subject's second leg rests".

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 10-14 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6 of U.S. Patent No. 4,738,269. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 10 omits numerous limitations found in claim 4 of the patent. It would have been obvious to modify the claim of the patent to eliminate limitations such as measuring change in the angular orientation of the subject in the selected plane of motion. Claims 11-14 omit numerous limitations found in claim 6 of the patent. It would have been obvious to modify claim 6 to eliminate

Art Unit: : 3736

limitations such as measuring the change in angular orientation of the subject in the selected plane of motion. The added language describing as the subject sways from the equilibrium position reducing changes in the angle between the orientation of the subject and the inclination of the support surface is merely describing the inherent occurrence of the subject trying to compensate for the motion of the support surface. There is nothing unobvious about the natural motion of the subject to the motion of the support surface.

7. Claims 1-9 remain allowable over the art of record as discussed previously.
8. Applicant's arguments filed February 1, 2002 have been fully considered but they are not persuasive. Applicant argues the declaration does indeed identify at least one error by stating "(the applicant) did not appreciate how limiting were the claims that issued" and thereby the error is the original claims were too narrow. However, applicant must state at least one word, phrase or expression in the specification or in an original claim in regard to the original claims being too narrow. Applicant argues new claim 15 is similar to claim 8, however, there is no antecedent basis for paragraph c of claim 15 in the specification. Applicant states rejected claims 10-14 will be canceled, however, they are not presently canceled and remain rejected.
9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

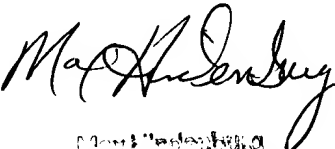

Art Unit: : 3736

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
